

Coding Reference Guide for Measurement Year 2025

Follow-Up After Abnormal Mammogram Assessment (FMA-E)

Measure Description

The percentage of episodes for Members 40-74 years of age with inconclusive or high-risk BI-RADS assessments performed October 3, 2024 through October 2, 2025 that received appropriate follow-up within 90 days of the assessment.

Definitions

Intake Period: October 3, 2024–October 2, 2025

Episode Date: The dates of service during the intake period when a high-risk or inconclusive BI-RADS score was documented.

BI-RADS Assessment: Clinically documented BI-RADS score. BI-RADS is a standardized classification system proposed by the American College of Radiology, used for imaging of mammography, ultrasound, and MRI of the breast.

The following codes meet the criteria:

<p>High-risk and inconclusive BI-RADS Assessment during the intake period that received appropriate follow-up.</p> <p>Appropriate follow-up is defined as either of the following:</p> <p>A high-risk BI-RADS assessment result that received a breast biopsy on or within 90 days after the episode date (91 days total) (Category 4: Suspicious; Category 5: Highly suggestive of malignancy)</p>	<p>High Risk BI-RADS</p> <p>RadLex Radiology Lexicon: RID36030, RID36031, RID36032, RID36033, RID36034</p>

Members who died any time during 2025	

Tips and Best Practices to Help Improve Performance

- Order and schedule mammogram appointments before the Member leaves the office
 - Have a list of facilities available to share with Members
- Document medical and surgical history in the record, including dates and procedure names
- Document all screenings in the medical record, noting the specific dates and results
- Use correct diagnosis and procedure codes; submit claims and encounter data in a timely manner
- Stock patient areas and exam rooms with breast cancer screening educational materials
