

Coding Reference Guide Measurement Year 2025

Metabolic Monitoring for Children and Adolescents on Antipsychotics (APM-E)

Measure Description

Children and adolescents one-17 years of age who had two or more antipsychotic medications (same or different medication) dispensed on different dates of service during 2025 and had metabolic testing during 2025.

Three rates are reported:

1. The percentage of children and adolescents on antipsychotics who received at least one test for blood glucose during 2025:
 - Glucose Test
 - HgbA1c Test
2. The percentage of children and adolescents on antipsychotics who received at least one test for cholesterol during 2025:
 - LDL-C
 - Cholesterol Test
3. The percentage of children and adolescents on antipsychotics who received both blood glucose and cholesterol testing during 2025 on the same or different dates of service:
 - Blood Glucose Testing (Glucose and/or HgbA1C)
 - Cholesterol (LDL-C and/or Cholesterol)

Antipsychotic Medications

Miscellaneous antipsychotic agents	Aripiprazole, Asenapine, Brexpiprazole, Cariprazine, Clozapine, Haloperidol, Iloperidone, Loxapine, Lurasidone, Molindone, Olanzapine, Paliperidone, Pimozide, Quetiapine, Risperidone, Ziprasidone
Phenothiazine antipsychotics	Chlorpromazine, Fluphenazine, Perphenazine, Thioridazine, Trifluoperazine
Thioxanthenes	Thiothixene
Long-acting injections	Aripiprazole, Aripiprazole lauroxil, Fluphenazine decanoate, Haloperidol decanoate, Olanzapine, Paliperidone palmitate, Risperidone
Psychotherapeutic combinations	Fluoxetine-olanzapine, Perphenazine-amitriptyline
Phenothiazine antipsychotics	Prochlorperazin

Tips and Best Practices to Help Improve Performance

- Ensure that Members who take antipsychotic medications receive yearly testing for blood glucose and cholesterol
- Encourage billing staff to use CPT-CAT-II codes. CPT-CAT-II codes are intended to facilitate the collection of information about the quality of care delivered by coding specific services or test results that support performance measures
 - Using CPT-CAT-II codes will reduce the need for record abstraction and chart review and minimize the administrative burden
- Utilize the monthly MVP Gaps in Care Report (GIC) for a list of Members and services still needed
- Educate Members about appropriate screening with certain medication therapies
- Submit results to your local Regional Health Information Organization (RHIO)
- Consider using alerts or flags within the electronic health record (EHR) for preventive tests
- Document medical and surgical history and preventive care in the medical record and include the date and result
- Use correct diagnosis and procedure codes and submit claims and encounter data in a timely manner
- Stock patient areas and exam rooms with screening educational materials
