Tips and Best Practices to Help Improve Performance

- Utilize the monthly Gaps in Care Report (GIC) for a list of MVP Members and the services they still need
- Consider using alerts and flags within the Electronic Health Record (EHR) for screening tests
- Discuss the importance of early detection and encourage screenings; refer annually if needed
- Document preventive care, medical, and surgical history in the medical record with specific dates and results
- Use correct diagnosis and procedure codes and submit claims and encounter data in a timely manner
- Encourage billing staff to use CPT Category II (CPT-CAT-II) codes, which are intended to facilitate the collection of information about the quality of care delivered by coding specific services or test results that support performance measures. CPT-CAT-II codes will lower the need for record abstraction and chart review and minimize the administrative burden
- Stock patient areas and exam rooms with educational materials such as those found here:
