Aggregate vs. Embedded Aggregate (AGG) Deductible: All family plan individuals pay together toward one deductible amount before the plan will make payments.  $^1$ Silver 4 Health Reimbursement Arrangement (HRA) comes with an Embedded HRA plan and requires a \$50 employer contribution. <sup>2</sup>Unless otherwise noted, all plan deductibles and/or out-of-pocket maximums are embedded.

<sup>3</sup>Gia telemedicine services will be \$0 after the deductible is met on MVP QHDHPs beginning January 1, 2025, upon plan renewal unless the Affordable Care Act 2023 QHDHP/HSA safe harbor is further extended.

Aggregate vs. Embedded Aggregate (AGG): For a family plan with an aggregate deductible, all individuals on the plan pay together toward one deductible amount before the plan will make payments. Embedded (EMB): For a family plan with an embedded deductible, each member pays their own, individual deductible. Once an individual has met their deductible, no further deductible is required of them for that plan year. Other family members continue to pay toward their individual deductibles until the family deductible is met. An embedded out-of-pocket maximum works the same way.
